

You are here: www.biophysik.de

BioPhysik Technologie

We are glad that you are interested in our products and services. On the following pages, we would like to introduce our company as well as giving you an overview of our products.

Production and development of new measurement systems

The BioPhysik Technologie team develops and produces measuring instruments for the examination of radioactivity, electric smog, for geomagnetic measurements of the earth's magnetic field and its anomalies and for the detection of geological disturbances like geographic faults or underground watercourse.

Our products and services are optimised for your benefit! Learn more about us and our business philosophy.

If you have any questions please let us know. We look forward hearing from you and will respond to any of your requests with the best advice and support. To contact us directly please send us your message via our contact form.

Best regards

Your Team of BioPhysik Technologie
